

Ventus Managed Connectivity-as-a-Service

Managed Solutions that maintain the highest levels of network availability

Ventus is an industry leader in Managed Connectivity-as-a-Service (CaaS) with over 24 years of experience delivering secure managed enterprise class networks. Ventus Managed CaaS includes architecting network infrastructure, supplying hardware, provisioning network connections, managing deployments, and delivering lifecycle network monitoring, maintenance, and technical support.

Network Failing?

How Managed CaaS removes that risk

Network Service Providers

Supplier-agnostic cellular, high availability data plans including 5G Unlimited plans

24x7x365 Technical Support

One-call resolution with insight into hardware's behavior and network availability over time to ensure the appropriate prescription for resolution

Continuous Monitoring

Pre-empt degrading and chronic network connections, know the trouble spots ahead of time

Ventus Managed Connectivity-as-a-Service provides a fully managed solution for Wireless WAN, Cellular for SD-WAN, Hybrid WAN, and Dedicated WAN networks using cellular, Broadband, Ethernet, and MPLS connectivity from the largest selection of national, regional, and local network service providers. From end-to-end, Ventus Managed CaaS provides total network management and support.

Ventus engineers work with you to design and architect a fully integrated Wide Area Network tailored to meet your specific business needs. Ventus' supplier-agnostic philosophy sources the network service providers that are most appropriate for each location while project managers ensure deployments are seamless and project deadlines are met.

All networks are monitored 24x7x365 by the Ventus Technical Support Center (TSC). The Ventus TSC is there to answer any questions with our one-call resolution. Handling all direct communications, escalations, and ticketing with network service providers.
